SIS-VT-1

DIGITAL VOICE TRANSFORMER

The **SIS-VT1** is a Digital Voice Transformer that modifies the voice in various natural tones allowing the user to stay anonymous.

The **SIS-VT1** gives you total control over your voice: Timbre, Tone, Pitch, special effects and High-Quality Digital Stereo Reverb. No other voice changer unit on the market offers these exclusive features. Apart from being the ultimate DJ effects unit, the **SIS-VT1** will benefit virtually any application where signal manipulation is needed.

The Digital Voice Transformer **SIS-VT1** can be used for Personal Security and Protection in the Phone Communications, musical and artistic activities as well as recording studies, karaoke, broadcasting and even home video for adding special vocal effects, but also for logistic and investigative scopes.

Perfect for any Applications featuring Voice. The **SIS-VT-1** can change a male voice into a female or even a child's voice, yet sound completely natural. It lets you configure user Patches with completely different voice characters and rapidly switch between them to take on different roles.

Centering the Mix Balance slider lets you mix a man's dry voice together with the same voice transformed into a woman's for a duet. Alters voice, creating new sounds for a variety of applications.

The **SIS-VT-1** is a unique device designed for altering and effecting the human voice or any other signal..

The user-friendly tabletop design features four sliders for total control, real-time adjustments and precise level:

- **PITCH** slider raises or lowers the fundamental note pitch; +/-1 octave pitch shift capabilities.
- **FORMANT** slider adjusts pitch of formant components, creating an effect virtually the same as changing vocal cords and the shape of the vocal tract.
- **MIX BALANCE** slider allows mixing dry and effected voices.
- **REVERB** slider adds stereo reverb equivalent to high-quality dedicated units
- **ROBOT** button turns your voice into a robot
- **BYPASS** button
- **WRITE** button to store a setting
- **4 Preset Patches + 4 User Patches**
